

CE Mechanical, Inc.TM
COMMERCIAL AIR CONDITIONING AND BUILDING AUTOMATION

BUILDING AUTOMATION

EXPERIENCE THE CE DIFFERENCE

Since 2002, CE Mechanical has been performing Building Automation Installations, Service, and Retrofits Creating 'Intelligent Buildings' that are smarter, more efficient, safer, use less energy, have lower operating costs and contribute to a sustainable environment.

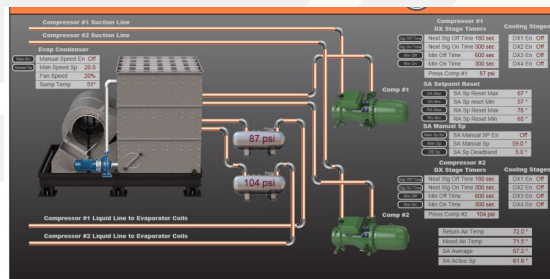

At CE Mechanical, we have partnered with Cylon Energy. Our Cylon Energy solution rivals many of the alternative providers with a significant cost savings. Our open protocol platform allows us to integrate into existing systems.

Manage your building 24/7, in real time. With an advanced Building Automation system and client portal, you will know the state of your building's mechanical system at a click of button, allowing you to detect problems that waste energy and impact the comfort of the people in those buildings.

TYPICAL INTEGRATIONS INCLUDE:

- VAV box retrofits
- Air Handler Control
- Central Plant Controls
- Heating Hot Water Loops
- VRF Integration
- Remote Monitoring
- Mobile Connectivity
